

AMENDMENTS TO THE CLAIMS:

I
1. (Currently amended) A purified recombinant thermostable enzyme which ~~is similar but not identical to an enzyme having an amino acid sequence of SEQ ID NO:1 with regard to their amino acid sequences and which is obtainable from SEQ ID NO:1 by recombinant DNA technology, and which has the following~~ physicochemical properties:

(1) Action

Forming non-reducing saccharides having a trehalose structure as an end unit and having a degree of glucose polymerization of at least 3 from maltotetraose and reducing amylaceous saccharides having a degree of glucose polymerization of at least 3;

(2) Optimum temperature

About 75°C when incubated in 20 mM acetate buffer (pH 5.5);

(3) Optimum pH

About 5.0-5.5 when incubated at 60°C for 60 min;

(4) pH Stability

About 4.5-9.5 when incubated at 25°C for 16 hours;

(5) Thermostability

Substantially not inactivated even when incubated in an aqueous solution (pH 7.0) at 85°C for 60 min.; and

(6) ~~Partial~~ Amino acid sequence

I
Having an amino acid sequence of at least two
contiguous amino acid residues in SEQ ID NO:3
and/or SEQ ID NO:4 and ~~being encoded by a~~
~~chromosomal DNA which hybridizes to a probe having~~
~~the nucleotide sequence of 5'-AAYTNTGCTAYTTYA-~~
~~ARGA-3' (SEQ ID NO:7) and a probe having the~~
~~nucleotide sequence of 5'-GARGARTGCCAYWSNATHAT-3'~~
~~(SEQ ID NO:8) not having the amino acid sequences~~
of SEQ ID NO:1, SEQ ID NO: 3, and SEQ ID NO:4.
